

# THE NEW PREMIUM POLISHING PADS

**General Tool**, a leader in the design and manufacture of diamond tools, is introducing a new premium wet polishing pad for natural and engineered stone.

The new pads were tested against two premium competitive pads on both white granite and black granite using a Makita PW5001C grinder turning at 3500rpm. The working time was 40 seconds for each grit size. The results were measured with a gloss meter after the final 3000 grit pad was used.

## SUPERIOR PRODUCTS PROVIDE A SUPERIOR SHINE IN LESS TIME

ITEM	MANUFACTURER	PADS	BLACK GRANITE AFTER 3000 GRIT	WHITE GRANITE AFTER 3000 GRIT
7 STEP WET PAD	COMPETITOR A		78-84	63-67
	COMPETITOR B		67-75	62-67
