

INTRODUCING A 15mm GENERAL PURPOSE MASONRY BLADE MADE IN THE USA SMX30LF

General Tool, the leader in construction diamond tools, is expanding our *Made in USA blade line* with a **laser welded** blade utilizing a **15mm segment**. This **cost effective** blade offers the same fast cutting benefits as our 12mm version, but with substantially longer tool life as a result of the taller segments. Designed for **general purpose masonry applications**, the segments are laser welded to allow for either wet or dry use. The blades are available in 12" – 16" with either 1" or 20mm arbors.

Part Number	Size
SMX30LF1212B	12" x .125 x 20mm
SMX30LF1212E	12" x .125 x 1"/20mm
