

PCD CUP CUP WHEEL

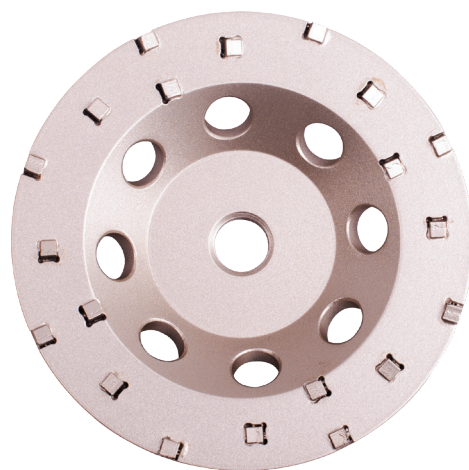

A NEW GENERATION OF CUP WHEELS FROM GENERAL TOOL

The **next generation** of PCD cup wheels from **General Tool** are manufactured using three rows of smaller PCDs. This combination provides **significantly faster stock removal**. The three rows produce a larger surface area which results in **longer tool life**. The generous spacing between the diamonds prevents the wheel from loading whether it's used wet or dry.

- 4" cups come with 18 PCDs and are available with either 7/8"-5/8" or 5/8-11 arbors
- 4 ½" cups come with 20 PCDs and are available with threaded 5/8-11 arbors only
- 7" cups come with 24 PCDs and are available with threaded 5/8-11 arbors only

Application

For removal of epoxy, paint, or carpet glue and surface grinding of concrete, masonry, or stone

SIZE	PART NUMBER	#OF PCDs	ARBOR SIZE
4"	PCDCUP04C3	18	7/8"-5/8"
4"	PCDCUP04H3	18	5/8"-11
4.5"	PCDCUP45H3	20	5/8"-11
7"	PCDCUP07H3	24	5/8"-11
