

**GENERAL TOOL**

# 14" Chop Saw Blade

The 14" **Chop Saw Blade** from **General Tool** is our **newest blade for cutting metal** studs, rebar, angle and structural steel, rubber, plastics and other non-ferrous materials. It is designed with **patented brazing technology**, which provides an incredibly strong bond between the high-quality diamonds and the core. It will make **more cuts than up to 60 abrasive wheels**, and the solid steel core virtually eliminates breakage, making the **Chop Saw Blade much safer** than conventional abrasives. The high-quality diamonds are bonded to the core using advanced brazing technology, ensuring **lasting performance, cut after cut**.

**FOR USE ONLY ON A CHOP SAW**

Max RPM: 4,300
