

GENERAL TOOL

Long Blade Life. Excellent Value.

The **new ID30EF series [part # ID30EF1412E]** is the **newest sintered blade** from General Tool. The blade features tall **15mm segments** for longer blade life. The blade is designed for cutting a variety of **concrete and masonry applications**, giving the end user a **low cost** per cut. The ID30EF showcases General Tool's commitment to providing **high performing, long-lasting** diamond tools for a wide variety of applications and grades.
