QSC pattern **pro blade**
full speed ahead

The all-new QSC series pro blades from General Tool utilize an advanced pattern formula in each segment to maximize exposed diamond throughout the blade life, resulting in very fast cutting speed through medium to hard aggregates. The QSC is available in two bonds and two different diamond matrices, ensuring that we have the right blade for virtually any concrete cutting job. Available in 12"-60" diameters and up to .250" segment thickness, the new QSC blade is a true versatile performer, right out of the box.

- Notched segment for faster speed.
- Pattern diamond formula ensures optimal diamond exposure
- Tall 12mm segments promote longer blade life
- Designed to work on a variety of equipment, from hydraulic and electric saws to high horsepower diesel walk behind saws
