

THE NEW SMX30UV PREMIUM DIAMOND BLADE

At **General Tool** we never rest when it comes to improving the performance of our products. The new **SMX30UV** premium diamond blade is further proof of that commitment. This blade is made to go **fast**. The fast smooth cutting action reduces stress on the operator and allows the job to be completed more quickly saving you money. The blade comes standard with a 12mm segment height providing long blade life.

A 14" blade was tested on 4500 psi concrete with a Stihl T5800 gas saw. We tested against an Arix blade, a Diamond Products Premium Black blade, and a Norton Duo Evo blade. Each blade made 200 cuts at 4200 rpm. Each cut was 20" long at a depth of 1 1/2". The results are below. The SMX30UV took an average of 22 seconds to make the cut. None of the other blades averaged less than 26 seconds. And the 12mm segment height provided the longest life of any blade in the test group.

Part numbers are listed below and most sizes are available for immediate shipment.

Average Time Per Cut (sec)

Part Number & Size

SMX30UV1212B	12" x .125 x 20mm	SMX30UV1812E	18" x .125 x 1" - 20mm
SMX30UV1212E	12" x .125 x 1" - 20mm	SMX30UV1814E	18" x .140 x 1" - 20mm
SMX30UV1412B	14" x .125 x 20mm	SMX30UV2012E	20" x .125 x 1" - 20mm
SMX30UV1412E	14" x .125 x 1" - 20mm	SMX30UV2014E	20" x .140 x 1" - 20mm
SMX30UV1612B	16" x .125 x 20mm	SMX30UV2414E	24" x .140 x 1" - 20mm
SMX30UV1612E	16" x .125 x 1" - 20mm	SMX30UV2415E	24" x .155 x 1" - 20mm
