

ZENESIS™ V2 SERIES PROFESSIONAL SERIES BLADE

The new ZENESIS™ V2 Series features a triangular diamond structure and specifically placed diamonds to control the exact time of diamond exposure, as well as the number of diamonds on the cut for uniform wear and optimum sawing performance. Field-test results have confirmed high cutting speed and long tool life on heavily reinforced concrete as well as overlay and other materials. A large selection of bond hardness and diamond concentrations are available to cover the majority of applications.
